Publish the eight drafts in Posts → Drafts, each with a featured image	Owner, 30 minutes	Pages that can rank for "7 horses painting vastu", "pooja room wall ideas" and "diwali gift ideas" within 4 to 8 weeks

Send the studio street address, city, state and ZIP	Owner, 1 minute	Full Organization schema, stronger local and entity signal
Email past customers for reviews using the prepared text	Owner, 1 hour	Star ratings in Google results once five or more reviews exist
Google Business Profile, Pinterest boards per category, community newsletter outreach	Owner with Claude's drafts	Backlinks and brand searches: the slowest but largest long-term lever
Measure against the baseline	Claude, 12 Nov	Compare with 276 clicks in 16 months and zero deity queries

Realistic target

Deity and Vastu category pages indexed and ranking on page one or two for their exact terms within 6 to 8 weeks, and the first measurable clicks from "radha krishna painting", "7 horses painting vastu" and "ganesha painting" searches by mid-December, in time for the Diwali-to-Christmas gifting window.

Google needs two to six weeks to recrawl, reindex and rerank changed pages, so results lag the work. Full detail, sources and before/after tables are in the main report, The Art Framer USA SEO Report.
