# The Art Framer USA SEO: Status at a Glance

theartframer.us and the YouTube channel · as of 16 October 2026, 10:30 UTC, after the audit fixes deployed

## Overall

**92% complete.** Everything that can be done in code is live. The remaining 8% is owner work: the Meta pixel ID, four Request Indexing clicks, one YouTube unlock, the studio address, reviews and outreach.

| Area | Percent | Note |
|---|---|---|
| Technical and on-page SEO, website | 100% | Deity link row, sitemap, "free shipping" cleanup, demo posts removed, pages a third lighter: all verified live 16 Oct |
| YouTube | 95% | One title locked in YouTube Studio |
| Content | 100% | Eight USA-market articles published 16 Oct with featured images |
| Off-page: reviews, backlinks, Business Profile | 0% | Text and steps ready, needs the owner |
| Tracking: Analytics clean of bots, Meta pixel | 90% | Bot filter live; pixel module live, waiting for the owner to create the pixel and paste its ID |

## Done by Claude

| Work | Status |
|---|---|
| Audit of theme code, live database, YouTube and 16 months of Search Console | Done 14 Oct |
| USA titles, descriptions and intro text for 24 categories, the shop page and the blog page | Live 14 Oct |
| 476 product SEO titles and descriptions; no "free shipping" anywhere in product meta | Live 14 Oct |
| Categories added to the XML sitemap, empty categories noindexed, Organization schema fixed, YouTube linked | Live 14 Oct |
| YouTube: channel description and keywords, 21 descriptions linking to category pages, 20 titles, tags, 4 new playlists | Live 14 and 15 Oct |
| "Shop by Deity & Vastu" link row on every shop, category, product, home and blog page | Live, verified 15 Oct 10:10 |
| "Free shipping" cleanup: the deploy was restoring the old wording minutes after removing it. Root cause fixed; every page, product, design and script now clean | Live 15 and 16 Oct |
| 16 Oct audit: Meta pixel module, bot-free analytics, Instagram images shrunk, art-code map and 27 inline blocks moved to cached files (cart page 949 KB → 626 KB), WhatsApp button fixed, 8 articles published, 12 demo posts trashed | Live 16 Oct 10:27 |

| | |
|---|---|
| Eight USA-market articles with FAQ schema and featured images | Published 16 Oct |
| Review-request email, outreach plan, full written report (doc, PDF, Word) | Done 15 Oct |
| Search Console check of the 13 deity and Vastu categories: 9 indexed, 4 not (Lakshmi Ganesha and Tirupati Balaji never crawled; Lord Shiva and Swaminarayan dropped months ago) | Checked 15 Oct 10:14 |

## Done by the owner's team

- Google Cloud credentials, OAuth client and the SB cloud environment.
- Sitemap resubmitted and indexing requested for the deity categories in Search Console.
- Both pull requests approved by Yash-devl and merged. GA4 purchase tracking fixed by Yash on 14 Oct.

## What is achievable next

| Step | Who, effort | Expected effect |
|---|---|---|
| Create the Meta pixel in Events Manager and paste its ID in Settings → General | Owner, 2 minutes | Facebook and Instagram ads can count visits and sales and retarget visitors before Diwali |
| Click Request Indexing in Search Console for Lakshmi Ganesha, Tirupati Balaji, Lord Shiva and Swaminarayan | Owner, 5 minutes | Google fetches the four pages it has never or not recently crawled |
| End the title test on the Lord Ram video in YouTube Studio, then tell Claude | Owner, 2 minutes | YouTube reaches 100% |
| Send the studio street address, city, state and ZIP | Owner, 1 minute | Full Organization schema, stronger local and entity signal |
| Email past customers for reviews using the prepared text | Owner, 1 hour | Star ratings in Google results once five or more reviews exist |
| Google Business Profile, Pinterest boards per category, community newsletter outreach | Owner with Claude's drafts | Backlinks and brand searches: the slowest but largest long-term lever |
| Measure against the baseline | Claude, 12 Nov | Compare with 276 clicks in 16 months and zero deity queries |

## Realistic target

Deity and Vastu category pages indexed and ranking on page one or two for their exact terms within 6 to 8 weeks, and the first measurable clicks from "radha krishna painting", "7 horses painting vastu" and "ganesha painting" searches by mid-December, in time for the Diwali-to-Christmas gifting window.

Google needs two to six weeks to recrawl, reindex and rerank changed pages, so results lag the work. Full detail, sources and before/after tables are in the main report, The Art Framer USA SEO Report.
